

'Evolution and disruption: Anticipating the impacts of 5G networks'
15th June 2017, London Excel

Draft agenda:

The faster, more responsive, more pervasive wireless coverage of 5G networks will provide the backdrop for breakthrough changes in numerous industries. In this summit, futurists will help audience members to anticipate scenarios for the convergence of evolutionary (incremental) and revolutionary (disruptive) trends over the next 5-8 years. Which areas of pent-up demand will be better served by 5G networks? Which new working methods will become practical? And what risks should be borne in mind?

You'll hear about transformation opportunities that deserve greater attention in the industries of healthcare, education, construction, agriculture, and finance.

11:00 Chair's welcome: **Anticipating the elephants on the 5G roadmap** –
David Wood, Chair, London Futurists

11:15-12:05: **Better networks for better healthcare**
David Doherty, Co-Founder & Director, 3G to 5G Doctor

12:05-12:55: **Better networks for better education**

- A revolution in mobile learning

Kirill Makharinsky, CEO, Enki

12:55-13:30: **Break for lunch and networking**

13:30-14:20: Panel Discussion: **Better networks for better construction**

- Improving collaboration in construction

Tony Shooter, Chair for Technology, COMiT

- Taking advantage of improved networks

Steve Slater, IS Operations, Wates Group

14:20-15:10: **Better networks for better agriculture**

- The future of precision farming

Will Wells, CEO, Hummingbird Technologies

15:10-16:00: **Better networks for better financial services**

- Blockchain and 5G for Finance: hype vs reality

Anish Mohammed, Lead Security Architect, HSBC

16:00: **Close of event**
