Working with Co-Management  
Questions?.

# What is Co-Management?

Device Managed by ConfigMgr? Intune? BOTH!  
Traditional -> Modern Management

Two Scenarios

- ConfigMgr Managed? Path to MDM (Intune!)
- Intune Managed? Path to ConfigMgr

# Why Co-Management?

Windows 10 as a Device  
Hybrid Management  
Modern Management – Today!  
Remove Modern Management Roadblocks  
An Additional Option (but very important)

# Requirements for Co-Management?

## Intune!

Windows 10 1709+

Azure Active Directory

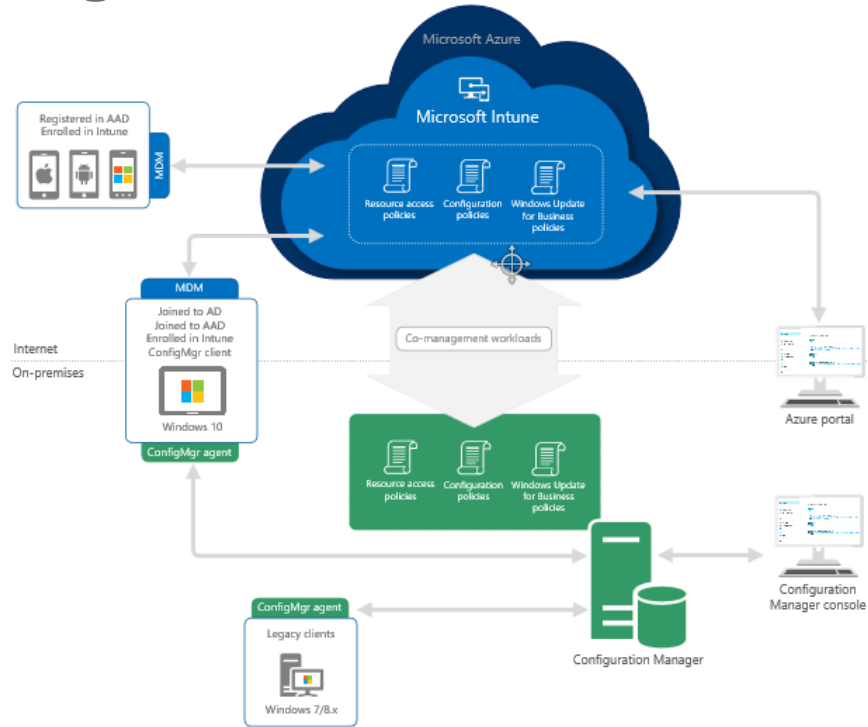

EMS/Intune

Appropriate Licenses

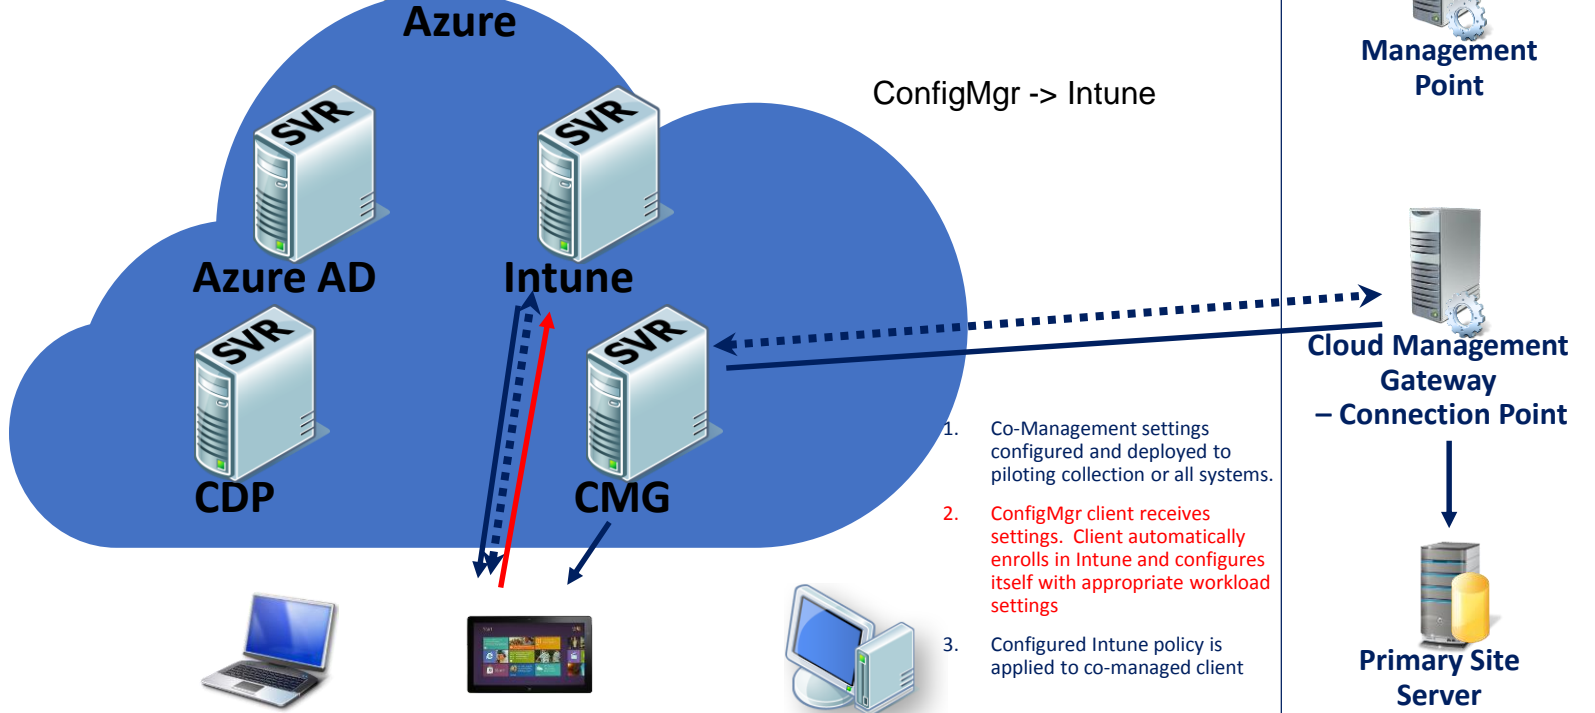

ConfiaMar

- 1710
- Cloud Management Gateway \*
- Cloud Distribution Point\*
- Azure AD Cloud Service
- Client Hybrid Azure AD joined
- Azure AD User Discovery
- ConfigMgr Client Approval
- User Policy
- ConfigMgr Client

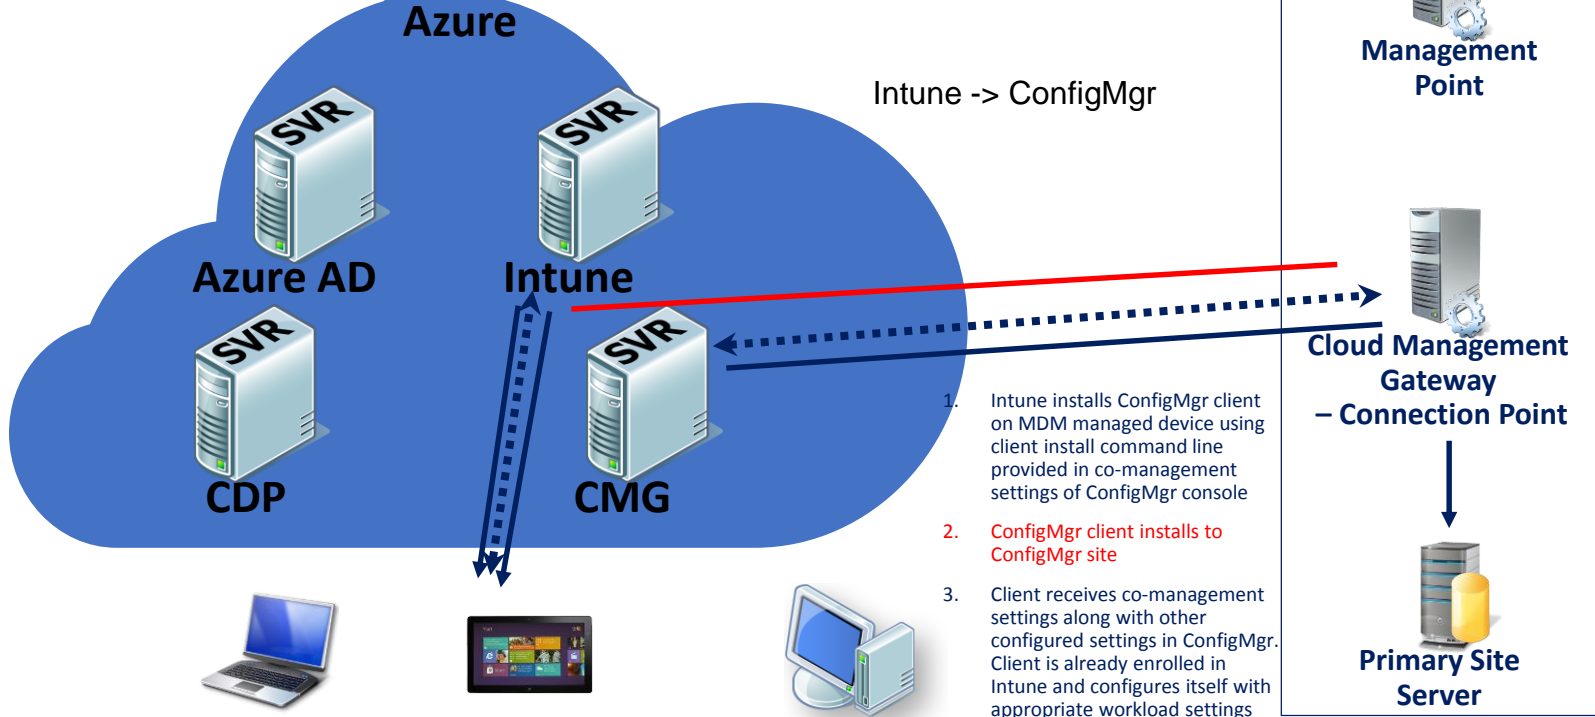

# Co-Management – How it Works

# Co-Management – How it Works

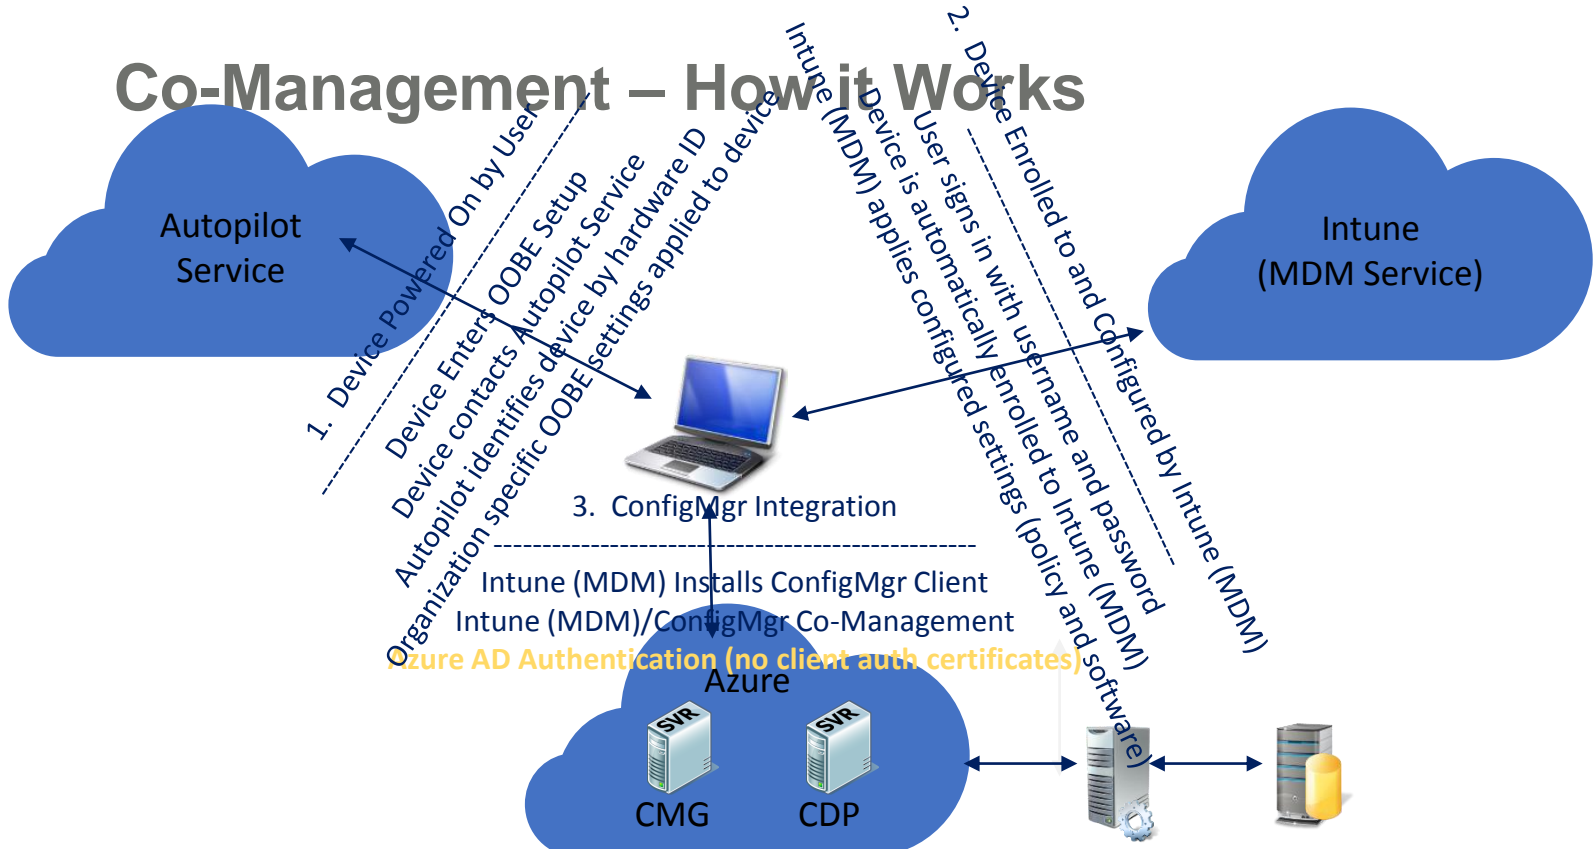

# Co-Management – How it Works

# Co-Management - Scenarios

Transition to Modern Management

- Partial
- Full

Focused-Use Devices

'Off-network' Devices

Maintain ConfigMgr but take advantage of MDM only capabilities

# Configuring Co-Management

## DEMO

- Enable Co-Management
  - Intune -> ConfigMgr
  - ConfigMgr -> Intune
- Co-Management
  - Today
  - Tomorrow
